

DIGITAL SKILLS WALLET

Newsletter #1

WHAT IS DIGITAL SKILLS WALLET?

The project DIGITAL SKILLS WALLET develops an eco-system supported by a **digital platform** for the Acquisition and Assessment of the Digital Competence with the use of **micro-credentials** on the 5 digital competence areas as per the DigComp framework.

THE DSW PLATFORM FOR CITIZENS

The DSW platform provides the capability to citizens to assess their digital skills and earn Micro-credentials which can be shared with potential employers and/or stored in a Digital Skills Wallet. The DSW platform also delivers a Micro-credentials Transcript for the assessed competence, a learning path along with suggested short courses that deliver those LOs still pending.

THE DSW PLATFORM FOR EDUCATORS

The platform is open to the community and will be sustained by the community. Central to the project, is the analysis into LOs of the descriptors for the 5 competences which will be the building blocks for micro-credentials. The platform allows educators to contribute with learning content and assessment questions to the platform, where both (content and assessment questions) are linked to micro-credentials. The system will assess the quality of the contributions using a peer review methodology, statistics gathered by the system and users' feedback. Learners wishing the issuance of micro-credentials, will be able to take a personalized assessment for a Digital competence area (1 to 5) they wish to assess.

MAIN DELIVERABLES

DSW PLATFORM

A Platform for the issuance of Micro-credentials and accumulations of Micro-credentials in a Digital Skills Wallet

GUIDE FOR EDUCATORS

A Guide for developing questions and courses for learning and assessing micro-credentials

ECO SYSTEM FRAMEWORK

A framework for the development of an eco-system for the Acquisition and Assessment of Digital Competence with the use of microcredentials

LARGE SCALE PILOT TEST

Large Scale Pilot test of the DSW platform with 1000 participants
