DIGITAL SKILLS WALLET PLATFORM (DSW)

The DSW Platform is an open platform to assess your digital skills. It is an open platform for the community by the community. Users can freely register and take up assessments that lead to the acquisition of micro-credentials (badges). These micro-credentials are stackable and lead to a certification on a competence area as outlined in DigComp. The platform also offers a series of bite-sized courses linked to microcredentials and support learning. AI is integrated in the platform which can suggest the learning path of the individual user based on their currently acquired micro-credentials and their assessment history. It also suggests which courses the user should take up next.

HOW IT WORKS

1. Starting on the DSW Platform

- Open the platform and read the short intro about DigComp and digital skills.
- View real-time stats (e.g., number of micro-credentials and courses).
- Click "Get a Micro-credential."

2. Choosing a Micro-credential

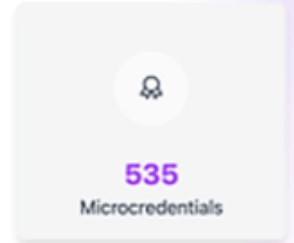

- Select "Suggest me a micro-credential" (AI help) or "Browse micro-credentials."
- Pick one of the 5 DigComp categories.
- Choose a specific competence within that category.
- View the micro-credentials available for that competence.

3. Earning the Micro-credential

- Take a 20-question quiz (randomly selected to cover all learning outcomes).
- Review your answers and submit.
- If you pass → The micro-credential is added to your Digital Skills Wallet.
- If you don't pass → You can retry, and the platform suggests courses to help you improve.

Earn Recognized Microcredentials in Digital Competence

Join our community-driven platform to assess and enhance your skills across the five key areas of digital competence, based on the EU's Digital Competence Framework for Citizens (DigComp). Receive a personalized learning path and earn microcredentials that can be stored in your Digital Skills Wallet. Ideal for lifelong learners and professionals aiming to stay competitive in the evolving labor market.

A PLATFORM OPEN TO EDUCATORS

Educators can contribute to the platform. They can request to become contributors and contribute to the platform with bite-size courses and assessment questions linked to Learning Outcomes of each microcredential. These courses are peer reviewed and are published if approved by two contributors.
